

INSTITUTE OF HEALTH MANAGEMENT RESEARCH BANGALORE

PLACEMENT BROCHURE 2012 - 2013

(L-R): Mr. K.J. Reddy - OSD, Dr. Fehmida Visnegarwala – Associate Professor & Chairperson - Placements, Dr. K.S. Srinivasa Rao – Director, Mr. Varun Sharma – Assistant Professor & Ms. Sumalatha – Executive Secretary

1. (L-R): Mr. Chethan Penkaiah & Dr. Amit Kumar (PGDHM 2010-12 Batch)
2. (L-R): Mr. Ajay Dubey & Ms. Pragnya Patnaik (PGDHM 2011-13 Batch)

Dear Sir/Madam,

Greetings from IHRM-B!

IHMR-B is one of the most dynamic, vibrant and academically exciting Hospital and Health Management Institutes in India. In its seven-year history, IHMR-B has produced very effective Healthcare Managers and it is a premier Institute in South India in the field.

In this period, IHMR-B has grown in all its focus areas of Health Management Education, Training and Research/Consultancy very well. In the area of Healthcare Management Education, we have been recognized by AICTE in 2010 with equivalence to MBA program. The overall curricula among the three IHMR campuses is well-harmonized and is upgraded with application of new knowledge, enriched with the industry expertise and diverse field research experience garnered by our faculty. Thus, this program brings out the best from each student in its pursuit of excellence and demand for professionalism and leadership, and has provided impetus to change in the health care sector in the national and global perspectives over the years. We also present our PGDHM 2011-13 batch of 53 students for Summer Internship Placements.

The students of Two-year, AICTE Approved, Post Graduate Diploma in Hospital & Health Management (PGDHM) 2010-12 Batch at IHMR-Bangalore have diversified background in terms of Graduation, Age, and Work Experience. Overall, these students have been chosen with a special eye for aptitude and leadership to take on the challenges of management facing the fast growing health care industry. Our academic program rigor ensures that the students meet the expectations of the Industry. This is accomplished through classroom teaching, Industry Institute Interface, Executive Lectures, hands-on training, field visits and live projects. Our students are exposed to industry by involving in Training Programs at two levels. Two month Summer Training and a four month for Final Dissertation.

In addition to academics, our students have taken part in various Competitions, Seminars, Conferences and Workshops. Our focus on Alumni and Industry Expert Networking has provided invaluable learning opportunities to our students.

We are very happy to present to you the profile of our PGDHM 2010-12 Batch of PGDHM. I am confident that our students will be an asset to your Organization and be able to meet your expectations with the professional training given by us. You will find in this batch of students Change Managers who would make significant contributions to your establishment by capitalizing on their profound knowledge, skill sets and hands on experience.

With Best Regards,
Dr. K.S. Srinivasa Rao
Director
Institute of Health Management Research (IHMR)

Dear Sir/Madam,

"IHMR-B" is an Institution where Knowledge, Research and Training create a distinctive edge for developing managers for the Hospital and Healthcare Industry for the last seven years.

We strongly believe and ensure the following: 1. Quality of students admitted 2. Quality of the educational program & faculty 3. A holistic learning environment which enables blending of advances in technology, healthcare practitioner perspective and application based learning along with overall personal & professional development.

In recent years, the healthcare sector has seen a radical paradigm shift, moving beyond the 'provider centric' delivery models to 'high tech responsible businesses with customer focus'. Rising costs, emerging technologies, managing people and competitive business environments are some of the major challenges the sector is facing.

We at IHMR-B are geared to respond to the challenging needs of the Healthcare Industry. It a high performing academic centre with outstanding faculty & staff, supportive alumni and students. Our reputation reflects the cutting-edge contributions of the faculty, the high caliber of student body, the dynamics of our progressive curriculum, technological orientation, and exceptional commitment to quality education and research-all in the ideal location of Bangalore Campus. Our classrooms provide diverse and rich learning environments. Initiatives are pursued that enhance curricular, co-curricular and extra-curricular activities for IHMR-B students, providing greater opportunities for professional and personal growth of students. Our specialization streams of Hospital Management and Health Management with specific inputs in Healthcare IT prepares the students to meet the necessary challenges in the fast growing healthcare sector. Placement during Summer Training at the end of first year (two months) and Dissertation Work at the end of second year (4 months) make each IHMR-B student not only Industry ready but also highly skilled managers.

I take this opportunity to invite you to IHMR-B for the Campus Placement of PGDHM 2010-2012.

Dr. Usha Manjunath
Chairperson-Academics

Dear Sir/Madam,

As the healthcare industry in India is poised to take a significant leap towards “inclusive growth” with an agenda for universal healthcare there remains a considerable gap in the availability of well-trained professionals. We at IIHMR, as an Academic Institution, have dedicated ourselves to bridging this gap by providing the “human-capital” by training capable, committed and innovative minds to 'manage' healthcare. In this accord, it gives me an immense pleasure to introduce you to, two batches of young, motivated, well-trained and talented professionals in the field of health care management at the South Campus of the IIHMR Society, Jaipur.

Our graduating batch of 21 students leaves the campus after completion of a full-time 2-year Post Graduate Program in Healthcare Management with a specialization in either 'Hospital' (15 students) or 'Public Health' (6 students) Management. We also present our PGDHM 2011-13 batch of 53 students for Summer Training Placements. At IIHMR, we have trained and prepared these budding managers from various backgrounds to practice innovative thinking to meet the demands of increasing sophistication in health care organizations and systems. This is well substantiated by the important positions held by our alumni. The students have completed their internship in various hospitals (large corporate and medium-sized hospitals), NGOs, NRHM and IT healthcare firms. Based on the feedback received from the industry liaisons, we glean that our students have been groomed in such a way that wherever they go, they make a distinctive difference. In addition, our students have been enriched with various field level experiences including hands-on Marketing Experience; Conduct, Analysis and Reporting in Health Facility Survey; Health Systems Monitoring and Evaluation Project; Quality Assessment in Hospitals; and Organization of Professional Workshops.

The process of placements for this year is similar to past years, where hospital, public health, IT health care and other stakeholder organizations will be invited to come to the campus in the first week of January i.e., 2-6 January 2012. Based on the potential for growth and the introductory package offered by the organization, the organizations will be given a slot to interact with the students during the Placement Week. I am proud to present these young professionals and am confident that they will rise up to their organization's expectations and rise to responsible leadership positions. I wish the graduating 8th batch of IHMR-Bangalore, all the success in their career and in shouldering the responsibilities given to them.

Our Standing

The Indian Institute of Health Management Research (IIHMR) Society, Jaipur has been the Vanguard of Health Management Teaching and Research in the country for the last 25 years. IIHMR continually strives to bring together principles of management and partnerships through its flagship program on public health and hospital management; IIHMR strongly believes that effective management is the core philosophy and sole driver of the success of health programs. Since its inception in 1984, the institute at Jaipur has made a distinct place for itself and has become a leading organization in the country engaging itself in health management research, education and training. Responding to the emerging needs and capitalizing on the new opportunities in the health sector, IIHMR has set up new campuses both in the South and North. The Institute's foray in South India was the establishment of another Institute at IHMR, Bangalore, Karnataka in 2004, and has quickly grown to be a premier Institute for Health and Hospital Management, teaching, training and research in Southern India. IIHMR society also set up its footprint in Afghanistan in 2004 in collaboration with Johns Hopkins School of Public Health. To capture the ever-increasing healthcare market of the East, IIHMR has already established a research office in Kolkata and has purchased land to construct building for launch of full- fledged operations by 2012. This clearly highlights IIHMR's national and international presence where it has made efforts to forge partnerships with nearly every stakeholder in the health/hospital and development sector. The Institute's goal to create and develop new human resources to perform professional management function has been successfully achieved. A critical mass of professional health and hospital managers has now been created in the country, and the changes in health care management in India have become perceptible and visible. The Postgraduate Program in Hospital and Health Management (PGDHM) has attained a status of a premier program in the country. The program has been Ranked # 1 in India in Healthcare Management for the last three consecutive years. The program has set high standards of management education in the health sector. Over the past two decades, the health care and systems research and program evaluation undertaken at the national and international level by the Institute has made a significant influence on policies and programs in the health sector.

Our Mission

IIHMR's mission statement recognizes the commitment and a vision for overall development in health sector. "IIHMR is an institution dedicated to the improvement in standards of health through better management of healthcare and related programs. It seeks to accomplish this through management research, training, consultation and institutional networking in a national and global perspective".

Our Ethos

Working together as partners, disseminating information and sharing knowledge at the national and global levels are the fundamental ethos of the Institute. An emphasis has been given to networking with prestigious universities and organizations at the international and national levels. The institute's network with its partners allows for funding through projects, and also provides a relevant and reinforcing feedback on its strengths and possible opportunities on which to build new linkages, research and projects. The Institute has carved a niche for itself and has reaped early bird advantage. It has close collaboration with international organizations such as UNFPA, UNICEF, WHO, World Bank, ODA, DANIDA, KFW & GTZ, NORAD, CARE and USAID, Ministry of Health & Family Welfare (GOI), Planning Commission, Indian Council of Medical Research, state governments. IIHMR,

Jaipur is a WHO Collaborating Center for District health systems based on Primary Healthcare. IHMR lays great emphasis on private sector involvement in healthcare which is achieved through forging sustainable partnerships, aggressive marketing strategies for their participation and providing opportunities for pilot testing and concept incubation. Thus IHMR garners strength from four pillars of operations, i.e., training, research, knowledge dissemination and networking.

Our Work

IHMR Bangalore was established in 2004 with a small but dedicated core team and assumed great strengths as the years went by. In a short span of time, IHMR Bangalore has achieved immense growth in the domain of academics, research, consultancy, training and projects implementation. It positions itself as a premier health management, research and training Institute in South taking projects for national and international organizations, governments of Tamilnadu, Karnataka and Andhra Pradesh and involved in a wide range of hospital consultancies providing expertise ranging from manpower planning to NABH Accreditation.

The Institute has also been actively involved in providing wide range of consultancy services to existing and upcoming hospitals since its beginning. Under the hospital consultancy service, the Institution undertakes detailed evaluation of hospitals to assess the cost effectiveness of services, utilization of manpower and equipments, patient and staff satisfaction. Human Resource (HR) audit, streamlining the hospital systems, developing standard operating procedures etc are also part of the consultancy service and supporting the hospitals for NABH/NABL clearances.

We also have significant experience in carrying out Operations and Action Research, Social Assessment, Survey Research. Major thrust areas of research of institute focus on Primary Health Care, Health and Hospital Management, Population and Reproductive Health, Health Economics and Finance, NGO Management and Networking, HIV/AIDS, Programme Management and Evaluation, Quality Assurance, Health Sector Reforms and Programme Evaluation, and evaluation of different models of Public Private Partnerships. Some of the projects are interpretative in nature and have come up with new interpretations of ground reality. IHMR-Bangalore has successfully completed the social assessment study for Karnataka Health Systems Development Project with support from World Bank. This study was of vital importance as it emphasized on the needs and health status among the vulnerable communities.

The Institute entered into policy research and development in a major way, influencing policy making at the state and central government levels. Recently, the institute conducted Short Programme Review on Child Health in collaboration with WHO and UNICEF as Government of Karnataka a major stakeholder. The programme contributed towards policy planning and decisions for maternal and child health in Karnataka for the coming years.

IHMR leverages on the collective strength of its Management and Governing Board Members of the Institutes at Jaipur, Bangalore and Delhi. In addition, IHMR has a dedicated team that has assumed great strengths. There is experienced and seasoned faculty and well-qualified research staff coming from multi-disciplinary fields of Health Management, Marketing, Finance, Economics, Health Economics, Pharmaceutical Management, Epidemiology, Demography, Anthropology, Statistics, Operations Research, Psychology and others alike.

IHMR-Bangalore has a team of Senior as well as young Faculty members and Research Officers who have extensive experience in teaching, conceptualizing, conducting, implementing and documenting various projects and studies.

Our Capabilities

Some of the overall capabilities of the Institute has been enumerated below in terms of its core strength:

Health Management

- Expertise in the Project Management: planning, implementation, monitoring, evaluation and documentation
- Institutional capacity development: PHCs, CHCs, district hospitals, ANM training centres, district training centres and NGOs
- Programme evaluation
- Technical and Program Support: strategizing, capacity building, supportive supervision, participatory evaluation and process documentation
- Operations and Action Research
- Program Evaluation
- Social Assessment
- Survey Research

Hospital Consultancy

- NABH/NABL Consultancy
- Hospital Evaluation Studies
- Manpower Planning
- Hospital Process Redesign
- Business Process Reengineering (BPR) is an approach aiming at improvements by means of elevating efficiency and effectiveness of business process that exists within and across organization. IHMR Bangalore helps in improving
 - i. Customer Service
 - ii. Cut Operational Costs
 - iii. Become world class competitors

IHMR Bangalore has experience of carrying out evaluation studies and manpower planning in some major hospitals like St. John's Medical College, R.L.Jalappa Medical College (Sri Devaraj Urs University), JSS Hospital, etc.,

Management Development Programs (MDPs): Management Development Programs are designed to help professionals in broadening their understanding and improving the skills set to face the health-care challenges at responsible positions. The Institute has conducted a series of programs on leadership and management development in health care.

The institute has conducted MDPs in the disciplines such as Lifestyle Management, Research Methodology, Population and Reproductive Child Health in the context of Public Private Partnerships; Essentials of Six Sigma and NABH and NABL Accreditation for Hospitals, Clinical Research, Skills in developing Program Implementation Plans (PIPs) and District Action Plans (DAPs) for Public Health Program Officers; HIV/AIDS up-scaling of care and support etc.

The above research, consultancy and training projects are handled under the able stewardship of well experienced faculty and research staff. Most importantly, the experience and expertise garnered by the faculty from the above projects, directly translates into experiential sharing and teaching and field level participation for our students of the Post Graduate Diploma in Hospital and Health Management (PGDHM), Program. Thus our students are enriched with not only the didactic curriculum but also with the hands-on skill sets, which has given an edge to our IHMR graduates.

"I have worked with IHMR Bangalore team for couple of occasions e.g. Short Programme Review (SPR) Bihar, SPR Karnataka etc. I have also made a visit to IHMR Bangalore campus and was extremely thrilled at the warm reception, professional knowledge of the staff, academic excellence and well maintained campus. I see a lot of potential in terms of IHMR efforts in India viz. Research, Academics and towards contributing to National Rural Health Mission (NRHM) in terms of technical matters, monitoring and evaluation and providing young Managers. I would like to congratulate the Director, Staff and recent graduates that will surely become future leaders in the field of Public health".

Dr. Manpreet Khurmi, Consultant, Child Health, MOHFW, Govt. of India

"India, having 1.2 billion population faces the challenge of quality affordable health care. It is important to note, even the developed nations struggle to offer a complete health care solution for its population. Aging population, lifestyle diseases, new infectious disease add extensive pressure on the health system. The affordability of available health facilities is always a concern because of the poor economic conditions and escalating health care costs. The health care delivery in India needs innovative models to face the challenges of health issues. India need out-of-the box thinking to improve efficiency, develop new strategies along all health care practices. I appreciate the mission of IHMR as an academic institution and research institute to be part of this herculean task. I hope, academic institutions like IHMR partnering with health care organisations, will be able to make a big positive difference."

Dr. Sunil Kumar C.N., Chief Operating Officer, Narayana Hrudayalaya, Bangalore

"IHMR is one of the premier institutions in the area of health and hospital management in India. Its Bangalore campus is the latest and the first one in South India. The institution has a good infrastructure and able faculty to train students in the area of health management and research. We successfully accomplished several trainings, evaluation and advocacy activities in partnership with IHMR Bangalore. We value this relationship.

Dr. Sanjeev Upadhyaya, Health & Nutrition Specialist, UNICEF, Hyderabad

I IHMR Bangalore collaborated with IMaCS for sharing the research expertise in conducting the facility survey of more than 2000 units including private establishment of Karnataka. The piece of work is being done for Karnataka Health Systems Development Corporation, a World Bank funded initiative.

Our experience with the team was very good. The institute chose to use the opportunity to improve orientation and skills of students with respect to the public health arena. The inputs were extremely valuable and the program was run by the students and associates with discipline and enthusiasm.

In my opinion it is time that the Health Management practitioners must get a good orientation towards public health facilities and systems as this knowledge is going to pave way for a number of promising national and international opportunities with multilaterals, Consulting organizations and state Government bodies. More so the joy of improving quality of such public goods is phenomenal when compared with the gains made in private sector. 12th Plan has marked 300000 Crores for health care. Largest budget in terms of monetary value since independence. Good management of the plan has no substitute and the future lies in the hands of budding health management practitioners.

Dr. Sajal Sen, Asst General Manager & Head(Health Care), ICRA Management Consulting Services Ltd

Illustrious Alumni

"IHMR has given me the platform and insight to explore Health Insurance industry as a professional. Thanks to the Institute"

Dr. Saumya Kumar Misra, Regional Manager, ICICI Lombard

"I always believe it is the small things that bring in BIG changes. Healthcare is evolving and is poised to be the next big industry. Be it Healthcare consulting, Healthcare operations, Healthcare IT or Health Insurance, IHMR with its unique blend of innovative teaching techniques and practical training, provided me with a comprehensive understanding of the smaller things that are required to grow with the industry and to think BIG."

Dr. Senthil Nathan P, Sr. Business Analyst, ACS

"IHMR has an unique approach in teaching the hospital management fundas. The advanced curriculum, competent faculty, state of art infrastructure and the other learning tools drive the show in the arena. The mock drills, dissertation and other live assignments, guest faculty discussions with IHMR seniors always keep the budding managers as alive wire"

I am sure, IHMRians have proved their skills in bringing the business as per global benchmarks. In all the successful existing healthcare venture in India, there is an IHMRian as a corner stone.

I wish you all the best.

Dr. Ram Behin
Marfo strategic consultants

The Institute has Seminar Hall with LCD Projector, Computer, White Board etc., with a seating capacity of 50 participants. Video Conferencing facility is also available.

The Classrooms are equipped with LCD projector, separate seating arrangements for each student, Wi-Fi connectivity etc.,

The computer lab of the institute is the state of art facility with Wi-Fi internet connectivity to cater to the needs of the academic as well as research activities of the Institute. Dedicated Broadband Internet facility is available round the clock.

The library has a unique collection of publications in various fields in addition to the collection on Training Materials, Case Studies, Manuals, Reports and Conference proceedings are also available.

INDUCTION COURSES

- Human Process Lab
- Written and Oral Communication
- Essentials of Computers

CORE COURSES

- Health and Development: The main objective of the course is to provide the students with a basic understanding of health and current health-related issues in the broader context of social and economic development of the developing countries
- Principles of Management & Strategic Management: The course is intended to provide an in depth input about the basic principles of Management. The students are imparted knowledge and exposure to principles of management, through lectures, case studies, and assignments. The emphasis is both on theory and application of these theories in real life situations.
- Health Policy and Health Care Delivery System in India & Programme Planning, Implementation, Monitoring and Evaluation: Is designed to help students understand the existing health care delivery system in India, primary health care and National Health Policy. It also aims to enhance capabilities of students in policy analysis and to familiarize them with process of policy formulation and its linkages with programme planning.
- Essentials of Biostatistics: It helps students in basic statistical techniques in order to collect, compile, process, analyze, present data, and draw conclusions from the data at various levels in the health systems.
- Introduction & Applied Epidemiology: The objective of these two courses is to help the students understand the basic principles of Epidemiology, Epidemiological methods and approaches and their applications in epidemiological data and measurements in situational analysis, measuring disease burden and health status, and in planning, monitoring, supervision and evaluation of health care. The courses also help the students in investigation of outbreaks and epidemics, and planning and conducting disease surveillance, epidemiological investigations and epidemiological evaluations of health systems.
- Essentials & Applied Demography: These two courses are to help the students understand the basic concepts of population and demography. The courses will help students to understand population structure and changes over past years and future projections.
- Organizational Behaviour & Human Resource Management : The courses aim to develop a thorough understanding of individual and group behavior in organizational set-ups that would enhance the skills of prospective hospital and health managers in dealing with the Human Resources of organization.
- Marketing Management & Marketing of Hospital Services: It provides students the basic knowledge about the discipline of marketing services. The courses attempt to cover basic Marketing process.
- Essentials of Health Economics : The main objective of the course is to provide the participants with a basic understanding of economic principles for better Resource Management in the Health Care sector.
- Essentials of Financial Management : The course would aim to help students understand the basic financial management concepts and techniques, and provide a foundation for integrating these techniques into health care organizations.

- **Communication Planning and Management:** The course will provide the approaches, conceptual tools in planning and management of communication processes in hospitals and public health settings and out-reach programs in health services, and to develop skills for effective communication with clients and other stakeholders
- **Research Methodology & Health Survey Research Methods :** The objective of these two courses is to help the students understand the basic principles of research and methods applied to draw inferences from the research findings.
- **Hospital Planning & Facility Management in Hospitals:** The course designed to enhance the technical skill and knowledge of students to understand the intricacies of hospital Planning and Construction, and commissioning.
- **Organization and Management of Clinical, Support and Utility Services:** The objective of this course is to help the students understand the planning, Organization and Management of Clinical , Support and Utility Services in the hospital. The students will learn the skills of identifying the critical problems and suggest management solutions to improve them.
- **Materials and Equipment Management & Logistics and Supply Chain Management:** These two courses aim to develop requisite knowledge and skills in managing inventory, equipment, and drug supplies among the students. The course will also introduce essential drugs, rational use of drugs and prescription audit. The students will also learn store management and basic logistic and supply management at the facility level.
- **NGO Management:** The main objective of the course is to provide students an in depth knowledge of the administrative, financial and organizational aspects of non-profit organizations (NGOs).
- **International Health :** The course aims to develop requisite knowledge of the international health scenario, comparative analysis of disease burden in various countries, health systems and policies, in developed and developing countries, health sector reforms and country experiences, case studies
- **Management Information Systems:** The course is intended to provide overview of Hospital & Information Management System, its structure and functions. The students will be imparted knowledge of decision making in health care and application of information in performance tracking and analysis, monitoring of hospital and health services, supervision and impact evaluation. The students will also learn designing hospital information system and use of computers.
- **Health Insurance and Managed Care:** The course aims to develop an understanding of health insurance. It aims to equip the students with tools and steps that can be used for planning and implementing Health Insurance programmes in India.
- **Legal Framework in Hospitals & Health Legislations and legal issues:** The main objective of the course is to develop basic knowledge of legal framework and issues and laws surrounding hospitals and health care.
- **Quality Assurance in Health Care :** The objective of the course is to help students understand the basic concepts of quality in health care and develop skills to implement sustainable quality assurance program in the health system.
- **Operations Research:** The course aims to develop skills of Operation Research techniques that would aid the prospective health and hospital systems managers in decision making.

- Disaster Management : The main objective of the course is to develop basic knowledge of disasters and their consequent effect on the health of the human population, and help them to develop basic skills of managing situations during and after disaster.

Training - Summer Training (2 months) and Dissertation (4 months):

The training aims at giving an overview of management, functions and roles of managers as applicable to health care organizations. It will help students to understand basic issues involved in the art and science of management in 21st century in the context of health care system in India.
