

Workshop On
'Operational Effectiveness with Healthcare Project
Management Skills'

Organized by
Institute of Health Management Research
Bangalore

BACKGROUND

Karnataka State is a progressive state in southern part of India. It is said that this state has been blessed with large number of projects beginning from 1970's till recently. In fact the inputs from these projects have improved health indicators and also brought laurels to the state government health departments. In spite of this, there is less exposure, experience in running of the projects since the personnel will keep on changing and there is break in continuity of the understanding of the project and nuance of its implementation.

In this context, the domain of project management assumes greater importance in the ensuing days in view of many of the burning problems that are confronted with the state health authorities, for example, measles reduction, control of non-communicable diseases, mental health and others. This golden opportunity must be availed for the benefit of the individual and organization, which will enhance the skills of the individual and broaden the prospects.

PROGRAM COVERAGE

- To provide project planning strategies
- Project implementation tools & techniques
- Project financing & fund management
- Understanding the trends in health sector projects and its management
- Managerial attitude and skill in project formulation and implementation
- Project team development, sustainability & deliverable measurements

WHO SHOULD ATTEND

NHM Consultants, district health officers, taluk health officers, district project management officers, district programme managers, district evaluation officers, district accounts officers, IDSP staff, urban project consultants, BBMP Health Officers, NGO representatives, healthcare project implementers & leads healthcare task force, medical college faculty, private health entrepreneurs, government and private hospital settings, faculty and students of MPH/ MBA course institutes

TRAINING APPROACH

The programme pedagogy is based on Industrial Interactive sessions & Lectures, Experiential learning, DO-IT-YOURSELF Approach, Case Discussions, Training materials include PPT handouts; worksheets, etc. Hands-on experience will be gained by doing exercises and working in small groups throughout the Programme.
