## 1<sup>st</sup> National Workshop On

### Up-skilling of Orthopaedicians for Enhancement of Competencies

Direct talk with Experts

Panel discussions

Debates & Case discussions

Live Navigation TKR & THR

Live Shoulder surgeries

Alex Shoulder model for practice

Hands on demonstration of key surgical steps

Saw bones, Implants, Instruments (Ilizarov, Plasty, and Scopy)

Navigation for demonstration

**26-28 January, 2018**

Organized at

**Institute of Health Management Research  
Bangalore**

## BACKGROUND

Orthopaedic surgical skill is traditionally acquired during training in an apprenticeship model that has been largely unchanged for nearly 100 years. However, increased pressure for operating room efficiency, a focus on patient safety, work hour restrictions, and a movement towards competency-based education are changing the traditional paradigm. Not many efforts are made to learn from the experiences of developed nations and a very few open fora are organized in the developing countries for the dissemination of research findings of the developed nations in relation to skill development of clinicians. In this context, the domain of up-skill training and experiential learning assumes greater importance in the ensuing days in view of many of the practical problems that are confronted with the practicing and upcoming Orthopaedicians. This golden opportunity must be availed for the benefit of the individual and organization, which will enhance the skills of the individual and broaden the prospects.

## CONTENT OF THE PROGRAM

- Traumatology
  - Ilizarov,
  - Hip Arthroplasty,
  - Knee Arthroplasty
  - Orthopaedic Oncology,
  - Knee Arthroscopy session
  - Shoulder session
  - Pediatric orthopedics
- Day 1
- Day 2
- Day 3

## WHO SHOULD ATTEND

This program is meant for national and state level personnel working as orthopedic surgeons in private, public and corporate hospitals, faculty and students working in orthopedics department of medical colleges.

## TRAINING APPROACH

The training itinerary is meticulously planned to ensure that a thorough knowledge and skills is imparted to trainees.

- Eminent State and national level faculty will provide a rich knowledge of hands on training to the participants
- The audio visual aids will supplement the training objective
- To sharpen the skills of each individual Alex Shoulder training platform from USA will be available, saw bone models and all instruments and implants related to trauma and scopy/plasty will be available. Navigation Arthroplasty will be arranged for demonstration
- Panel discussion followed by interactive session.
- Training materials include PPT handouts; worksheets, etc. Focusing on the practical application of these skills, participants will work on real case situations and present their results
- Saw bones, instruments, implants etc.

## KEY RESOURCE PERSONS
